###Steps

1. **Initialize Project:**
   - Click on the "Update" or "Clear All" button to reset the project.

2. **Enter Basic Values:**
   - Input all the basic values present in the "BasicValue" sheet to format the table according to your preferences.

   Create Tables:
   - Tables will be created based on:
     - The number of students.
     - The number of questions in the first part.
     - The number of questions in the second part.

3. **Enter Inputs:**

   - Enter your inputs on the "Input" sheet.

4. **Link References:**

   - To link or get the percentage reference obtained by students, go to the "References" sheet.
   - Click on the "#Ref" button and enter the values based on that table.

6. **Calculate Grades:**
   - After entering the input for grades (1 grade and 4 grade marks), you can calculate the grades.
   - Your calculations will be ready.

PS:
   - While formatting the table, if there is any mistake to be corrected, please hit the "Update" or "Clear All" button and proceed again.
